

# mHealth Powered Virtual Trials

## 3D-ECG in patients' hands

### Conclusive Diagnosis

22-lead ECG with 4 electrodes, detecting any infarction & arrhythmia.

### Intuitive Use

User friendly interface – design driven by patients.

### Dynamic & Cost Efficient

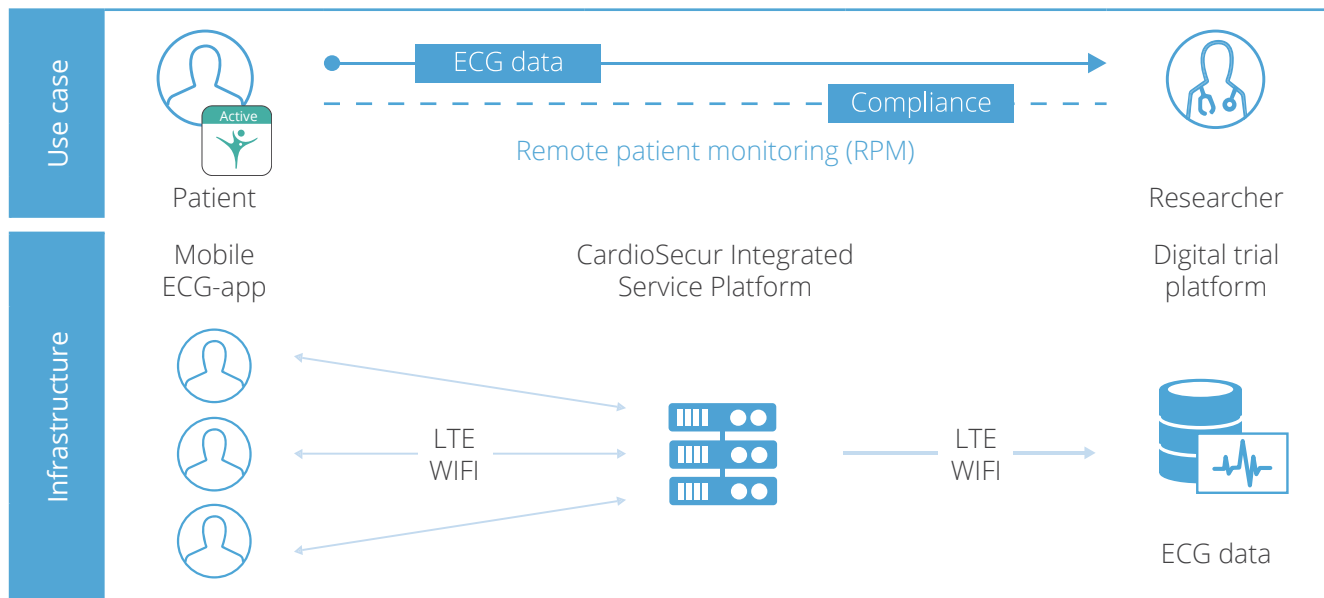

ECG pre-evaluation for effective investigator resource allocation.

### Secure Data Transfer

Pen-test scrutinised server to server technology with full EU-GDPR compliance.

## Patient-centric ecosystem

Our proprietary server cluster strictly complies with the EU-GDPR and Swiss data protection laws. CardioSecur is audited by the TÜV. Our entire data transfer utilises the secure HTTPS protocol and SSL-encryption with a 2048-bit rate.
